Cat. 1

DIRTWORKING

Food plots and small farms... just right for the Land Pride Disc Harrow.

The Land Pride DH10 Series Disc Harrow opens and breaks up the soil surface to help prepare the soil seedbed for planting. The forward gang has aggressive notched discs while the rear gang has a choice of notched or smooth discs to quickly break up and evenly redistribute the finely cultivated topsoil. The DH10 Series Disc Harrows have applications in landscaping, small nurseries, gardens, small hobby farms, and wild game food plots.

Disc gangs on the DH15 Series can be ordered with smooth or notched arrays for lighter or more aggressive applications based on customer needs. The DH15 is at home in applications from commercial landscaping, nurseries, and large gardens to small farms and municipal.

Just right to use between tree rows, in vineyards, or to fill in center-pivot irrigation tracks.
